\* This is the volatility measure (standard deviation) of the Market's response to past earnings announcements (ie - 24 quarters)  
The higher the number, the more likely future market responses will be relatively large.

\*\* This is the price change of the stock as a result of the earning announcement. It measures the price change difference one day prior to the earning announcement until one day after the earning announcement (an investment of only 3 days).

P.S. When you subscribe to our service, you will select 10 stocks and will receive a report for each stock  
IN ADDITION TO THE ABOVE TABLE.
